TITLE : SYSTEM FOR CORRECTING AND DELETING COMMUNICATION DOCUMENT

ABSTRACT : PURPOSE: To attain efficient correcting processing by transmitting a mail described for correcting and deleting information transmitted again by a sender to correct and delete of a transmitted document.

CONSTITUTION: When a mail transmitted in a format shown in Fig. A is desired to be corrected, a document correction information sheet shown in Fig. B is formed. That is, "need" is described in a column for the necessity of deletion at the right side of an destination code in case of address error. In case of correction, "insertion", "deletion" or "correction" is selected and necessary information is described in it and its position and contents are designated. This operation is attained by a terminal device 21, a terminal controller 11, and a document forming section of a controller 13. The reception side performs processing corresponding to the format A and the correction information sheet B.
